Not that I care that much, or use the service as I don't live in the cities, I think it's stupid to limit the ability of people to get accurate weather information.
Our weather information where I live, for example, is innacurate at times and you don't know until you're outside.

It seems this information helps keep people safe by avoiding certain areas. Helps their condition to sickness as what to wear. Helps COMMERCE by making our congested traffic ways as efficient as possible.

Thank you.
